Summary

Extensive web development experience working on mission critical applications. I am looking to be a good citizen on the internet and deliver robust, intuitive, and accessible interfaces. I strive to gather consensus from all stakeholders, Product, Engineering, and UX while focusing on the end-user. I am passionate about accessibility and detail-oriented.

Core Skills

- **UX/UI:** Accessibility (A11y), ADA, WCAG, WAI-ARIA, Figma, Storybook, Semantic Markup, Screen-Readers, Universal Design, responsive and adaptive layout, cross-browser, Photoshop, Illustrator, InDesign, Material UI (MUI)
- **Code:** HTML, CSS/SCSS/Sass/Less, ECMAScript (JavaScript), Typescript, Svelte, SvelteKit, React.js, Next.js, Angular, documentation, component frameworks, Bootstrap, jQuery, REST API, Single Page Applications, ZShell/Bash, JSLint, Prettier, Python, Object-Oriented, Design Patterns, Linux/Apache/MySql/PHP (LAMP), WordPress, Joomla
- **Dev-Ops:** AWS, S3, Amplify, Jest (Unit Testing), Chromatic, Node.js, Github Actions/Workflows, CI/CD, Snyk, Webpack, Rollup

Experience

GRAINGER; *Software Engineer II*

CHICAGO, IL | APR 2015–SEP 2024

- Improved speed, reliability and capabilities of Fortune 500 e-commerce platform by converting legacy components and pages to modern Single-Page Applications using microservices and component frameworks (Svelte, React)
- Kept our code working by supporting other teams in regular on-call rotation
- Improved internal usability with documentation for components in Storybook for other developer teams
- Helped our platform become usable by all by defining and implementing accessibility requirements and shaping our approach to developing UI components
- Improved product data by implementing a mechanism for onsite employees to provide feedback on internal search results
- Saved hundreds of Engineering Hours by automating dev-ops processes with GitHub Actions and Workflows and Bash scripts
